Education

The University of Tokyo — Bachelor's in Computer Science, Tokyo, Japan (2012 – 2016)

Experience

Fixie.ai — AI Engineer / AI Systems Architect (Remote)

April 2022 – Present

- Built RAG systems and LLM-powered applications.
- Developed AI automation tools and chatbots.
- Reduced support workload by 50%.

Mozart Data — Data & Machine Learning Engineer (Remote, Contract)

July 2020 – March 2024

- Built ETL pipelines and ML models for data-driven features.
- Developed recommendation systems improving engagement.
- Increased feature engagement by 40%.

Quilt Data — Backend / Systems Engineer (Remote, Part-Time)

January 2017 – June 2022

- Developed high-throughput APIs and distributed systems.
- Implemented caching and async processing for performance.
- Achieved 99.9% uptime handling 5M+ monthly requests.

Appcues — Senior Full-Stack Developer (Remote)

March 2016 – December 2019

- Designed scalable microservices architecture.
- Built high-performance React interfaces.
- Scaled platform from 10K to 120K users.

Projects

AI SaaS Assistant — Built full-stack AI assistant using LLM APIs and vector databases.

Distributed Data System — Designed scalable backend handling millions of requests.

Skills

Languages: JavaScript, TypeScript, Python, SQL, Bash

Frameworks: React, Node.js, Express, FastAPI

Databases: PostgreSQL, MongoDB, Redis

AI/ML: scikit-learn, Pandas, NumPy, LLM APIs, RAG

Tools & Technologies: Docker, AWS, GCP, Kafka, Airflow, CI/CD
